SKILLS

HTML / CSS / SCSS / SASS / LESS

Bootstrap / Skeleton CSS

jQuery

AngularJS

Node JS

ExpressJS

MongoDB

Mongoose

Authentication with PassportJS

Webpack

GulpJS

Git / Github

Adobe Photoshop

Adobe Illustrator

WORK EXPERIENCE

DEVMOUNTAIN CODING BOOTCAMP

Guest Lecturer

<http://devmountain.in>

- I was invited to present a lecture to a full-stack web-development class about the importance of authentication and how to implement it using PassportJS.
- The lecture included a brief overview of the history of authentication and how far we've come.
- I walked through building a simple MEAN stack application with user authentication using the Facebook strategy provided by PassportJS.

DEVMOUNTAIN CODING BOOTCAMP

Mentor

<http://devmountain.in>

- I guided a class of 20 students through the process of becoming full-stack, job-ready, web developers in just 12 weeks.
- I led lectures on each component of the MEAN stack.
- I scheduled weekly one-on-one meetings with students to track their progress and to readjust my teaching methods to cater to their individual needs.
- I worked alongside the lead instructor and the campus director to ensure the students' success.
- I received praise from not only our lead instructor and campus director, but most importantly, our students.

PROJECTS

PULP TALENT AGENCY

Full-Stack Web Developer / UI/UX Designer

<https://pulptalentagency.herokuapp.com/>

A work in progress, the goal of this project is to showcase photographs uploaded by the client. The client needed full control of the data so I connected the site with Contentful, a headless CMS with an API at its core. The technologies used for this project are AngularJS, Angular Masonry, jQuery, SCSS, ExpressJS, NodeJS, Webpack, and a few other small dependencies.

QUIX ANALYTICS

Front-End Web Developer / UI Designer

<http://quix.rookanalytics.com/>

As the lead front-end developer and UI/UX designer of this project, I was tasked with creating an intuitive user experience with a beautifully designed interface. The technologies I used for this project are AngularJS, jQuery, SCSS, ExpressJS, NodeJS, Gulp, MongoDB, and a few other small dependencies. My contribution to the project can be seen at github.com/JTJTJ-Analytics/clickhover

YENTE

Full-Stack Web Developer / UI/UX Designer

<http://107.170.210.151/>

For my personal project while attending DevMountain, I decided to create Yente, a curated publishing platform for developers with an eye for design. I was awarded Best Overall Personal Project and Yente is now featured on the DevMountain's website.
