## SKILLS

HTML / CSS / SCSS / SASS / LESS
Bootstrap / Skeleton CSS
jQuery
ReactJS
AngularJS
Node JS
ExpressJS
MongoDB
Mongoose
Authentication with PassportJS
Webpack
GulpJS
Git / Github
Adobe Photoshop
Adobe Illustrator

## ■ WORK EXPERIENCE ■

### AT&T                                        *Senior Applications Developer*
*http://www.att.com*

- Developing and architecting the front-end redesign of the new att.com experience using ReactJS and Redux resulting in a 300% lift in traffic versus the control.
- Working cross-functionally with back-end team who specialize in Adobe Target, Adobe Experience Manager, and Akamai to find solutions for integration with SPA frameworks such as React or Angular.
- Developing internal tools to improve our team's workflow and development experience.
- Leading weekly training sessions for colleagues focusing on ES6, ReactJS, Redux, and basic functional programming concepts.
- Lead developer on the marketing landing pages for AT&T's current TV page (www.att.com/tv) and accessories page (www.att.com/-accessories).

### XXIX                                        *Front-End Developer*
*http://www.xxix.co/*

- A one month contract with XXIX to provide front-end support.
- Strategized with design team to introduce parallax animations and UI elements that increase engagement and conversion while staying within the limitations of the browser.
- Provided architectural support on https://www.aidaeats.com and https://bethcomstock.info along with other conceptual projects to increase sales and exposure for the client.

### DEVMOUNTAIN CODING BOOTCAMP                  *Guest Instructor*
*https://devmounta.in*

- Presented a lecture upon invitation to a full-stack web-development class about the importance of authentication and how to implement it using PassportJS.
- The lecture included a brief overview of the history of authentication and how far we've come.
- Guided the class through building a simple MEAN stack application with user authentication using the Facebook strategy provided by PassportJS.

### DEVMOUNTAIN CODING BOOTCAMP                  *Mentor*
*https://devmounta.in*

- Guided a class of 20 students through the process of becoming full-stack, job-ready, web developers in just 12 weeks.
- Led lectures on each component of the MongoDB, ExpressJS, AngularJS, NodeJS (MEAN) stack.
- Scheduled weekly one-on-one meetings with students to track their progress and to readjust my teaching methods to cater to their individual needs.
- Worked alongside the lead instructor and the campus director to ensure the students' success.
- Received praise from not only the lead instructor and campus director, but most importantly, our students.

## ■ PROJECTS

### PULP TALENT AGENCY
*Front-End Web Developer / UI/UX Designer*

*https://pulptalentagency.herokuapp.com/*

A work in progress, the goal of this project is to showcase photographs uploaded by the client. The client needed full control of the data so I connected the site with Contentful, a headless CMS with an API at it's core. The technologies used for this project are AngularJS, Angular Masonry, jQuery, SCSS, ExpressJS, NodeJS, Webpack, and a few other small dependencies.

### QUIX ANALYTICS
*Full-Stack Web Developer / UI/UX Designer / Architect*

*http://quix.rookanalytics.com/*

As the lead front-end developer and UI/UX designer of this project, I was tasked with creating an intuitive user experience with a beautifully designed interface. The technologies I used for this project are AngularJS, jQuery, SCSS, ExpressJS, NodeJS, Gulp, MongoDB, and a few other small dependencies. My contribution to the project can be seen at github.com/JTJTJ-Analytics/clickhover

### YENTE

*http://107.170.210.151/*

For my personal project while attending DevMountain, I decided to create Yente, a curated publishing platform for developers with an eye for design. I wanted to reuse as much code as possible so I experimented with component based architecture introduced in AngularJS 1.5. I was awarded Best Overall Personal Project and Yente is now featured on the DevMountain's website https://devmountain.com/students. My presentation can be seen at https://youtu.be/bVcyUG9sH1E
